#### INCLUDED:

##### 4116D

- 6X LED pods
- 6X U mount brackets
- Harness
- Mounting hardware

#### INSTALLATION:

1	2	3	4
5	6	7	

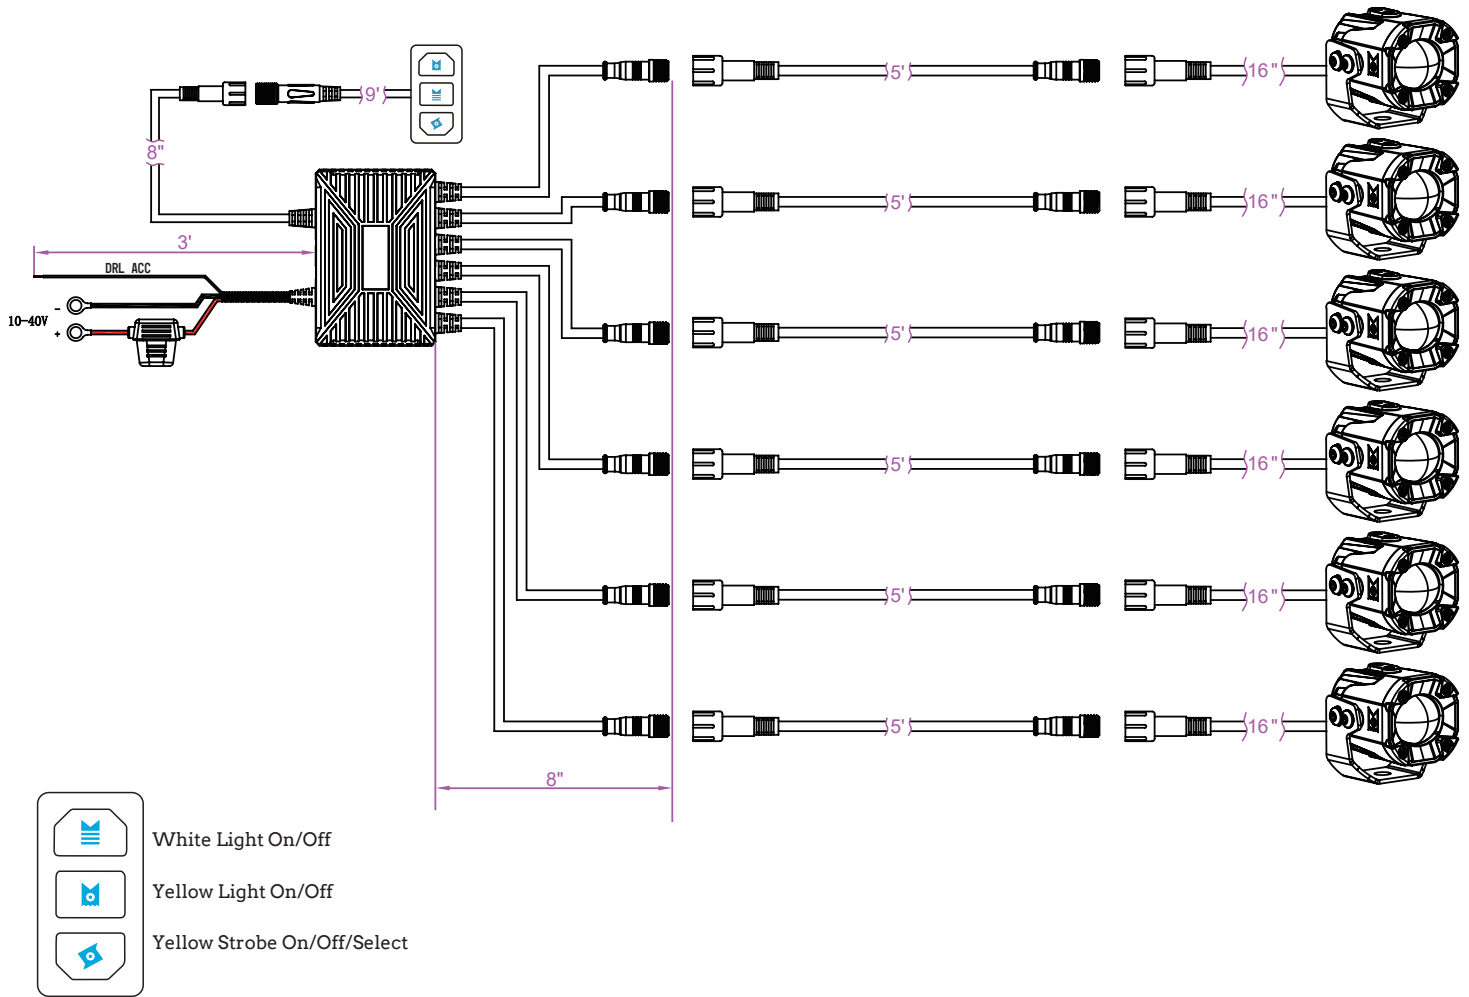

#### Note:

The Concept Pod Mini I #4116D is one of the light modules in the Tiny Monster Grille product line. A vehicle-specific mounting bracket is required to integrate these light modules into the factory grille. Please refer to the installation manual of the mounting brackets for detailed instructions: [www.arc.lighting/tiny-monster-grille](http://www.arc.lighting/tiny-monster-grille)

## INSTALLATION INSTRUCTIONS

CONCEPT POD MINI #4116D

- ① **The white light switch.** Press less than 1 second to turn the white light on or off. Press and hold to turn off the white light.
- ② **The yellow light switch.** Press less than 1 second to turn the white light on or off. Press and hold to turn off the yellow light.
- ③ **The yellow strobe light switch.** Press less than 1 second to turn the strobe light on, and press it again to switch to the next mode. Press and hold to turn off the strobe light. The sequence of modes will repeat as follows:

Mode 1	Mode 2	Mode 3	Mode 4	Mode 5	Mode 6
DRL	Hyper burst	Rapid strobe	Slow strobe	Staggered Sequential Burst	Alternating Rapid Burst

**Memory function:** When turning on the light, the last used mode will be recalled.

### Tips:

- ① When the white light or yellow light is activated, turning on the strobe light will automatically deactivate the respective white light or yellow light.
- ② When white or yellow main light is on, turning on the other (yellow or white main light) dims both lights by 50%. Turning off one light restores the other to full power.
- ③ If using auxiliary switches instead of the provided switch, connect the ACC wires to power to enable the corresponding functions.
